About the BioCharger:

The BioCharger is a energy revitalization machine. The BioCharger uses four energies that will stimulate the body, to optimize and improve health, wellness, and athletic performance.

What does the BioCharger Use:

The BioCharger uses, Pulsed Electromagnetic Fields, which are known as PEMFs. These PEMFs deliver electrical potential to the body. This is just like practicing "earthing" or "grounding" techniques. Once grounded the electrical potential then becomes equalized with the Earth's electrical transfer to you. PEMF's can improve pain and inflammation.

The Energies Used:

The energies used are Light, Frequency and Harmonics, Magnetic Fields and Voltage.

These are all natural energies that are found in nature. The BioCharger helps you get those outside energies inside!

Light

- Naturally occurring element gasses vibrating at the speed of light, which is what produces the light component.

Frequencies & Harmonics

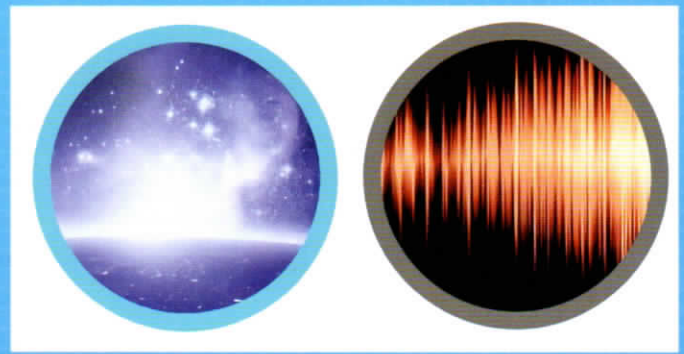

-Produced by the lightning strikes which are occurring within the atmosphere.

Earth's Magnetic Field

-Transfer of energy potentials.

Voltage

- Voltage for the cells to re-charge.
